

Cove Omni-T 1000 Induction Loop System

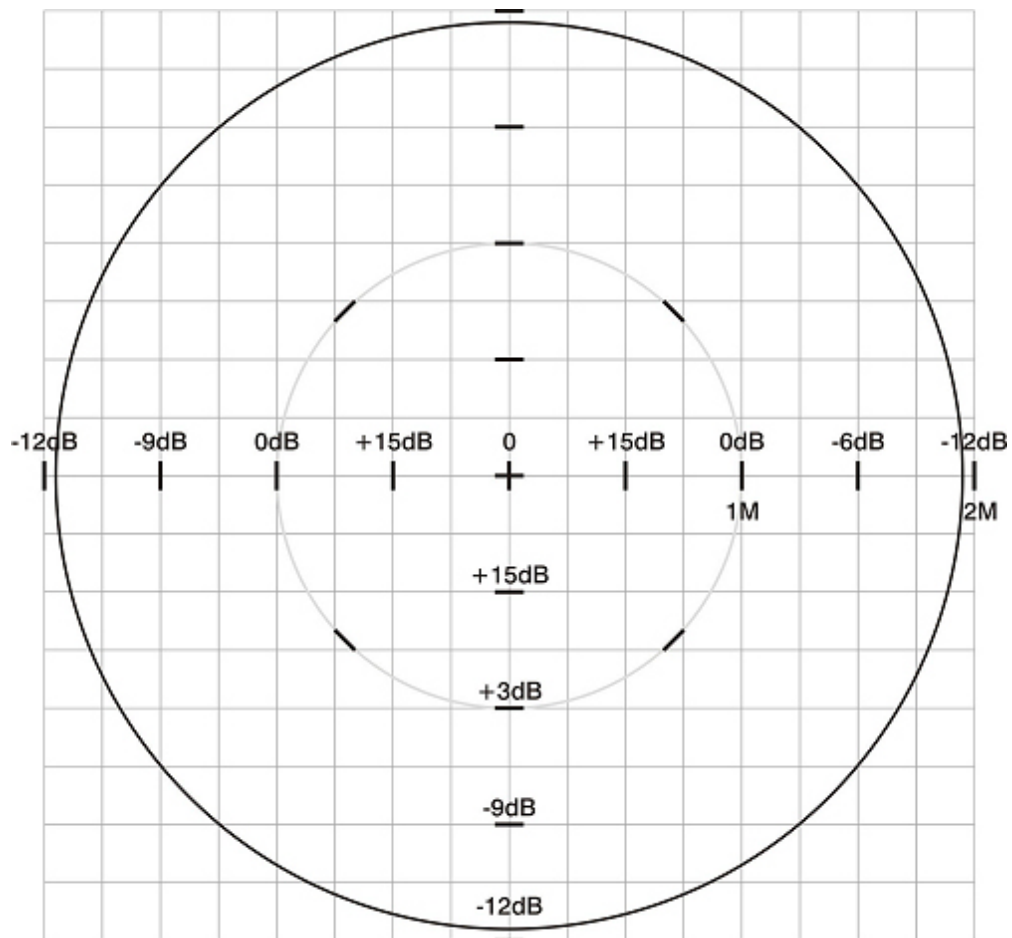

Technical Specification

Inputs

Audio Inputs 1 x 100v Line input (Balanced or Unbalanced)
 1 x Line input (200mV to 1V RMS)
 Two Part Screw Terminals

Dimensions

Aerial Height 250mm, Width 250mm, Depth 60mm

The Aerial should be wall mounted preferably on a non-magnetic surface and away from large metal objects. Wiring should be within approved conduit, preferably embedded within the wall for safety and immunity to vandalism. If the Aerial is contained within a Help Point it should be mounted and wired according to the instruction manual. If mounted separately it should be located at head height for ease of access and connected according to local wiring regulations.

This unit is constructed using non-combustible and fire retardant materials, which are low smoke and zero halogen emitting.
